

RED interchange API - Search/Read Organizations

Organizations are practices defined in RED as user groups. Organizations contain e.g. addresses and contact information for a practice. Organizations can be searched using a **search request (GET)**. Search for organizations will return a bundle including one or more FHIR items of type [KBV_PR_AW_Betriebsstaette](#).

For an example see [RED Interchange API - Postman Collection](#) example 004 All Organizations.

SEARCH request for all organizations

```
{{baseUrl}}/{{tenant}}/Organization?page=1
```

Example: this search requests fetches all organizations defined in RED using paging to limit the number of results.

Data of a specific organization may be fetched using a **read request (GET)** including the identifier of the specific organization. A read request returns one FHIR item of type [KBV_PR_AW_Betriebsstaette](#). A read request for an organization specifies the organization by its organization ID. The organization ID may be fetched by a previous search request.

READ request for a given organization

```
{{baseUrl}}/{{tenant}}/Organization/wK7hhpbEIG1qkSdvRCCd3AEA3W4lBfDB
```

Example: this read request returns the FHIR item for organization with ID wK7hhpbEIG1qkSdvRCCd3AEA3W4lBfDB. The ID may be retrieved by a search request sent before this request.

For an example see [RED Interchange API - Postman Collection](#) 0040 - All Organizations

Example of FHIR item for an organization

```
<Organization xmlns="http://hl7.org/fhir">
  <id value="JAVnINQ700y5dMkdorAuXSEJJJCPT2PAw"/>
